CROATIA

International Centre for Underwater Archaeology in Zadar (ICUA)

This new Centre was opened in September 2007 and is under the auspices of UNESCO. The main purpose of the Centre is to carry out educational activities in field of exploration, conservation and restoration of the underwater cultural heritage. It develops and shares state-of-the-art methods of research in underwater archaeology, conservation and restoration, training and exchange of knowledge. And after all it majorly contributes to building capacity in other countries in the region.

University of Southern Denmark

The University of Southern Denmark proposes a two years master programme in Maritime Archaeology. The programme provides a thorough understanding of Maritime Archaeology, in both its practical and theoretical aspects. Students are encouraged to use empirical and theoretical approaches in examining the cultural and historical importance of the sea. The programme also gives students splendid opportunities to work with the broad spectrum of methods in the field of maritime heritage. These include introductions to both the theory and practice of underwater surveying, remote sensing and field conservation. Moreover students are given a solid basis in management. The course duration is 24 months and it requires a Bachelor (BA) degree in a relevant discipline. Free Tuition for students from European Union/EEA.

Centre Camille Jullia

Link : <http://sites.univ-provence.fr/ccj/spip.php?rubrique55>

Description : The Centre Camille Jullian is a laboratory dedicated to Mediterranean and African archaeology, founded by the University of Provence, CNRS and the French ministry for culture. It focuses on research and specialised teaching about the Mediterranean region in the field of human and social sciences. Subjects taught range from naval archaeology to history of techniques (implantation and port infrastructure, fishing and sea resources, commerce of alimentary resources, technical knowledge, transfers, and experiments). In the framework of the research activities in maritime archaeology, a cycle of seminars is regularly organized under the direction of G. Boetto, P. Pomey et A. Tchernia.

Type : Academic, doctorate

The French Federation of Underwater Studies and Sports (FFESSM Fédération Française d'Etudes et de Sports Sous-Marins)

Link : <http://archeoblog.hostoi.com/ffessm/>

Description : FFESSM proposes training in underwater archaeological techniques and diving; and moreover several federal certificates in underwater archaeology. Although they are not indispensable to apply for the participation in an underwater archaeological excavation, they provide the theoretical and practical basis. The divers (trainers, students, voluntary searchers) must have a minimum II level dive certificate and a temporary derogation to the hyperbaric legislation to be allowed to participate in excavations.

Type : Non-academic, association, delegate organisation

Address : FFESSM
1 Rue de Milan
69100 VILLEURBANNE
Contact: Alain Lavocat (Secretary)

University of Primorska

Link : <http://www.zrs-kp.si/>

Description: The Institute for Mediterranean Heritage UP SRC is an interdisciplinary research unit that coordinates and conducts research at the regional and international levels and is in charge of the development of contents and programs related to heritage in the broadest sense. Linking various humanistic sciences with their own research fields, the institute garners creative potential and combines research approaches of various scientific disciplines related to the preservation of natural and cultural heritage. The aims of the Institute of Mediterranean Heritage are not only to perform professional analyses and coordinate conservation

procedures, but also to evaluate the heritage and publish the findings in scientific circles and present them to the general public.

The institute has conceived the study program in the Heritage of the Mediterranean and Europe that is carried out by the Faculty of Humanities of the University of Primorska. As part of this program seminars on underwater cultural heritage are proposed, that however do not include practical work.

<http://www.rug.nl/let/onderwijs/master/kunstgeschiedenisarcheologie/archaeology/archaeologyofthenetherlands/maritimeArchaeology>

Description: In 2008 a new chair in Maritime Archaeology was established at the University of Groningen. The main focus of research is on inland and coastal shipping and the maritime cultural landscape of Northwestern Europe in the Roman and (post)medieval period. Special attention is be paid to shipwrecks in the province of Flevoland.

The University proposes a Master Program in Maritime Archaeology that is articulated in a theory and practical sessions and requires the redaction of a thesis.

In 2007 the International Field School for Maritime Archaeology Flevoland (IFMAF) started as an educational programme in which the University of Groningen joins forces with the RACM, the province of Flevoland and the municipality of Lelystad. The annual fieldschool includes the excavation of a shipwreck in Flevoland during which the specific field techniques needed in maritime archaeology can be developed under controlled conditions on land.

National University of Kyiv-Mohyla Academy

Link:

http://www.ukma.kiev.ua/ua/mag/index.php?option=com_content&view=category&id=60:2010-05-14-10-01-51&layout=blog&Itemid=71&layout=default

Description: The course in Underwater Archaeology was started in the in 2010/2011 at the National University of Kyiv-Mohyla Academy as part of the Master's program in Archaeology and Ancient History of Ukraine (Laboratory of Archaeological Research).

The aims of the course in Underwater Archaeology is to familiarize students with the history and methodology of the study of underwater archaeological sites and their characteristics in comparison with terrestrial archaeological sites; to demonstrate the interaction of underwater and terrestrial archaeological research and other disciplines.

The constituent parts of the course are 1) historiographical seminar dedicated to studying the history of underwater archaeological sites in Ukraine and abroad as well as the relevance of such research; 2) seminar on the human body under the water, the history of diving equipment, the modern individual equipment for underwater diving, the development of technical tools used in the study of underwater cultural heritage; 3) methodological seminar on the peculiarities of the influence of water environment on underwater archaeological sites and methodology of archaeological reconnaissance and search in the coastal zone with people in diving equipment and deep-sea research with instrumentation and robotics; method of conservation of underwater archaeological sites (cities, villages and wrecks); method of preservation of underwater artifacts and objects, the method of restoration of artifacts; exhibiting objects of underwater cultural heritage; 4) seminar on international cooperation in the sphere of protection and research of underwater cultural heritage: results and prospects, the UNESCO Convention, national legislation on the protection of underwater heritage.

Students can take part in underwater archaeological expeditions to the the Chersonese Taurica (Sevastopol, Crimea, Ukraine).

Kyiv National Taras Shevchenko University

Link: www.fieldschool.univ.kiev.ua
www.diver.univ.kiev.ua

Description: There is only one unique educational organization which combines both research and educational programmes on underwater archaeology in Ukraine: the Centre for Underwater Archaeology (CUA) at Kyiv National Taras Shevchenko University. It is a research and educational organization that focuses mainly on nautical archaeology throughout the Black Sea region and underwater archaeology in Ukraine in particular. The main aim of the CUA is to involve students, amateurs, sport divers and members of the general public in maritime archaeological field excavations and surveys, as well as educate them regarding this fascinating field and the preservation of underwater resources. Students study theory, methodology and the techniques of underwater archaeology, and acquire practical experience during summer excavations. The Centre is currently carrying out learning and training programmes for first year students, as well as developing a master's curriculum, which is a part of the general master's course in archaeology at the Department of Archaeology and Museum Studies. After attending the theoretical portion of the programme, they can actively participate in underwater archaeological expeditions. The expeditions are a very important part of the educational programme. While participating, the students who attended prior preparatory lectures and training sessions can implement their knowledge and practice their skills in a hands-on environment.

Bournemouth University

Link: www.bournemouth.ac.uk/courses/msma

Description: Maritime archaeology has been an active research theme within the School of Conservation Sciences since the autumn of 2001. The Marine Archaeology Research Group is currently engaged in research on many of England's Designated Historic Wreck sites.

The School offers a Master of Science (Msc) degree in Maritime Archaeology. This course focuses on the principles and practice of maritime archaeology of all periods up to the 20th century within the broader international context. With climate change creating long term alterations in the marine environment, this will be the first taught course internationally to include units that address this issue.

The course consists of 5 units plus a Research Project (dissertation). The aim of the course is to develop the skills and initial experience required to undertake maritime archaeology in the field and/or prepare them for further study. Key skills taught during the course, such as project management and analytical skills, are widely transferable to a range of disciplines. The Msc may be studied full-time (1 year) or part-time (2 years). Tuition fees apply. Entry requirements are Honours degree or equivalent professional experience in Archaeology and related subjects including Anthropology, History and Marine Science.

University of Bristol

Link: <http://www.bris.ac.uk/archanth/postgrad/maritime.html>

Description: One of several Master's Programmes offered by the University of Bristol, the MA in Maritime Archaeology and History at the respective Centre for Research is an established maritime archaeology programme. The program involves instructor-led courses and a dissertation. It aims to combine a sound historical and theoretical introduction to maritime archaeology with practical experience. The course includes optional practical training in underwater archaeology, as well as an introduction to artefact studies, historical boats and ships, and field trips. The MA may be studied full-time (1 year) or part-time (2 years). Tuition fees apply. The University is situated within walking distance of the Floating Harbour at Bristol, one of England's most historic ports. Beyond Bristol, the harbours, wrecks, preserved ships and maritime museums of south west England provide a rich focus for teaching and field experience, from the prehistoric and Romano-British periods through to the 20th century.

University College London, Institute of Archaeology

Link: www.ucl.ac.uk/archaeology/maritime/masters/MA-maritime.htm

Description: The Master in Maritime Archaeology aim is to relate maritime archaeology to the broader body of archaeological knowledge and theory, rather than treating it as a discrete sub-discipline. The course does not set out to train archaeological divers, but to show the range of approaches and methods used by maritime archaeologists today, and to demonstrate the relevance of maritime issues in wider urban, nautical, social and economic studies, as well as regarding legislation, conservation and heritage matters. Students are required to take the core course Issues in Maritime Archaeology and the equivalent of two whole element MA options. The programme lasts for twelve months (starting in September), although it is also possible to take the course part-time over two years. Most of the structured teaching takes place in the autumn and spring terms, the summer being devoted to dissertation work.

Southampton University

Link: <http://www.southampton.ac.uk/archaeology/cma/>

Description: The Centre for Maritime Archaeology at Southampton University offers a one-year taught Master's Course in Maritime Archaeology (either MA or MSc). The

programme includes six taught units and a dissertation. Two core units are normally compulsory and cover the theory and methodology of maritime archaeology. The first, Maritime Aspects of Culture, is more thematic and deals with the development and scope of the subject, current research, theoretical perspectives and central issues. The second, Archaeology Underwater, focuses on the practical application of archaeological principles in underwater environments and associated skills. Practical work including participation in ongoing research projects in the UK and abroad is a major part of the course. Students can continue to PhD. The Centre also offers numerous courses relevant to maritime archaeology, for instance in archaeological computing, survey and recording, ceramic and lithic analysis, and heritage management.

Description: The Archaeological Studies Program (ASP) at the University of the Philippines Diliman was established on August 24, 1995. Multidisciplinary in nature, ASP is designed to oversee and coordinate instructional, research and extension activities pertaining to the systematic discovery, reclamation, analysis, presentation and preservation of the material remains of past cultures. The underwater archaeology course of study is offered within the diploma and MA/MS programs in coordination with the different colleges of the UP Diliman.

Regional Training Workshop on Underwater Cultural Heritage in Asia-Pacific

Link:

<http://www.unescobkk.org/culture/our-projects/underwater-cultural-heritage-movable-heritage-and-museums/underwater-cultural-heritage-in-asia-pacific-waters/regional-training-workshop-2009-2010/>

<http://unesdoc.unesco.org/images/0018/001869/186930e.pdf>

Description: Under the auspices of UNESCO and the Government of Thailand, with funding from the Royal Norwegian Government, this training course engages students in a six-week intensive programme on the basics of underwater archaeology and cultural heritage management through lectures and field work. The curriculum includes topics such as the 2001 UNESCO Convention on the Protection of Underwater Cultural Heritage and its Annex, underwater archaeological resource protection and management, 3D site survey, in situ protection and preservation, significance and assessment, and risk mitigation. The Ruela Mail and a number of other wreck sites lie conveniently close to both the UNESCO Asia-Pacific Regional Field Training Centre in Underwater Cultural Heritage, established in early 2009, and the National Maritime Museum, in Chanthaburi.

Australia

Australian Institute for Maritime Archaeology (AIMA)

Link: www.aima.iinet.net.au/nas/aimanas.html

Description: The AIMA teaches, in conjunction with the British Nautical Archaeology Society (NAS), a four-part course on maritime archaeology (introduction, survey day school, 100 contact hours, portfolio presentation). The general aim of the course is to introduce the methods and procedures employed in underwater archaeology, as well as to generate awareness regarding shipwreck preservation in Australia. On completion of each of the courses, students are awarded an internationally-recognized AIMA/NAS certificate.

James Cook University, Queensland

Link: http://www.jcu.edu.au/sass/aas/JCUPRD_021386.html

Description: JCU has been able to develop a unique maritime archaeology programme due to its proximity to the Great Barrier Reef Marine Park and its existing expertise in marine science.

The Maritime Archaeology Field School is an accredited archaeology subject offered by the Department of Anthropology, Archaeology and Sociology at JCU and can be attended separately or as part of the Bachelor programme in archaeology. It provides an introduction to the techniques of underwater survey, position fixing, mapping, photography (including video), detailed recording and conservation. This intensive course is delivered through fieldwork and culminates with a diving opportunity on the famous Great Barrier Reef. It is available to students who hold appropriate diving certification and satisfy the competency requirements of the University Diving Officer. A tuition fee applies.

Flinders University, Adelaide

Link: <http://www.flinders.edu.au/ehlt/archaeology/the-department/specialisations/maritime.cfm>

Description: The Graduate Programme in Maritime Archaeology (GPMA) was established in 2002 and is now the largest and most successful in Australia. It is designed both to meet the needs of students who have a four-year degree in archaeology or anthropology wishing to specialize in maritime archaeology as well as those who come from a different academic background (such as history). The programme is built on the premise that a maritime archaeologist needs to be more than an archaeologist who can dive. In addition to practical fieldwork-based training, the programme provides students with a strong academic and theoretical grounding across a wide range of areas in maritime archaeology and underwater archaeology. Students can choose to study on-campus where both full- and part-time studies are available or can study externally (currently only available part-time).

The Graduate Programme in Maritime Archaeology offers the following degrees: Graduate Certificate in Maritime Archaeology 1 semester (6 months); Graduate

Diploma in Maritime Archaeology 2 semesters (12 months); and Master of Maritime Archaeology 3 semesters (18 months). The normal minimum entry requirement for all three courses is a four-year undergraduate degree from an approved tertiary institution majoring in archaeology or an equivalent qualification. There is a tuition fee.

http://www.archaeology.arts.uwa.edu.au/for/future/postgrad/maritime_archaeology

Description: Two courses – a postgraduate course and a Master in applied Maritime Archaeology – have been taught in the School of Social and Cultural Studies since 2005. These postgraduate degrees are taught every 2 to 3 years in Perth, Australia. The aim of the programme is to provide the specialist practical skills and knowledge required to be employed or conduct higher degree research in Maritime Archaeology. The courses are taught by archaeologists at the University of Western Australia (UWA) and The Department of Maritime Archaeology, Western Australian Museum (WAMM). The Diploma of Applied Maritime Archaeology is designed as a one-year full-time programme requiring two semesters of study with diving to take place in the summer months. In addition to these programmes, the University also proposes a course to obtain a Certificate of Applied Maritime Archaeology and this is offered in an intensive fashion over circa 8 weeks.

Description: The Program in Maritime History and Nautical Archaeology offers a master's degree that, combining classroom lectures and seminars with hands-on field projects and internships, provides thorough training for those interested in a professional career in maritime history and nautical archaeology. The degree is offered through the Department of History.

Each summer the Maritime Studies Program sponsors a field school in nautical archaeology. There is also Maritime Studies Conservation Laboratory that offers a wide range of conservation services including the stabilization and preservation of archaeologically recovered artifacts from both terrestrial and underwater projects, and that provides material fabrication analysis.

University of Hawaii, Manoa

Link: www.hawaii.edu/mop

Description: The Marine Option Program is designed for undergraduates in any field of study who have an interest in the ocean. The Marine Option Programme Certificate (similar to a minor) is awarded undergraduate students who have successfully completed 12-16 credit hours of marine-related courses, IS 100 (a MOP Seminar) as well as a MOP Skill Project. It is open to students in all fields and provides a clearinghouse for marine-oriented education and employment opportunities as well as a chance for students to network with professionals and fellow students who are involved with the ocean.
The programme also regularly organizes symposia on marine archaeology.

Texas A&M University and Institute of Nautical Archeology

Link: Texas A &M University: <http://nautarch.tamu.edu>
INA: <http://ina.tamu.edu>

Description: The Nautical Archaeology Program (NAP) is an academic degree granting graduate programme at Texas A&M University (TAMU). The Nautical Archaeology Program is a part of the Department of Anthropology. The programme was established in 1976. The Institute of Nautical Archaeology (INA) is a non-profit private research institute affiliated with TAMU and works with the Nautical Archaeology Program.

Students and faculty conduct underwater archaeological research in conjunction with the renowned Institute of Nautical Archaeology (INA) in various regions of the world, delving into time periods from prehistory to the recent past, and working with a plethora of societies and cultures. Students attending the programme work in the classroom as well as in the field, and are encouraged to pursue individual projects that will help direct nautical archaeology's future.

University of West Florida, Pensacola

Link: <http://uwf.edu/anthropology/research/maritime/>

Description: In addition to a terrestrial archaeology programme, the University of West Florida (UWF) has established the Marine Archaeology Program in the Archaeology Institute that conducts major research projects.

The university offered its first field school in maritime archaeology in 1989 with the Deadmans Island Shipwreck Project. Since that time, UWF students have

participated in a host of underwater activities including the Emanuel Point Shipwreck Project, the Santa Rosa Island Wreck, the S.S. Florida, the Rhoda, the Catharine, Hamiltons Shipwreck, the Snapper Wreck, and the Opal Wreck. Students have also used remote sensing tools such as side-scan sonar and magnetometers to survey for shipwrecks and other maritime remains in Pensacola Bay and nearby Mobile Bay, Alabama. On occasion, maritime archaeologists from UWF are also called on to document non-shipwreck entities, such as the submerged remnants of the Pensacola Electric Company Railway. The Archaeology Institute at the University of West Florida employs two full-time nautical archaeologists who direct field investigations and teach summer field schools, undergraduate and graduate maritime archaeology classes and artefact conservation. The institute proposes an interdisciplinary BA and a Minor in Marine Studies that integrates five primary fields of study, including marine archaeology.

Argentina

Programa de Arqueología Subacuática (PROAS) del Instituto Nacional de Antropología y Pensamiento Latinoamericano

Link: www.inapl.gov.ar/invest/arqueosub.htm (not updated)

Description: The Programme, that was created in 1995, is research oriented. Nonetheless is also provides training opportunities for different audiences. In most cases the training offer is based on demand.

For archaeologists and archaeology students with or without experience in diving they offer theoretical and practical training in maritime and underwater archaeology as a complement of the graduate and post graduate degrees in Anthropology and Archaeology that the Universidad de Buenos Aires. The Institute has an agreement with the University but there is no formal, regular training in maritime or underwater archaeology. Practical skills can also be obtained through an internship at the PROAS and experienced divers can apply to participate in fieldwork projects.

In addition non-formal introductory courses to underwater archaeology courses are provided on the basis of material prepared by the Nautical Archaeology Society (NAS) and in collaboration with diving schools are occasionally (in function of demand). PROAS is the only institution in Argentina currently running NAS courses.

Universidad Nacional de Rosario

Link: http://www.fhumyar.unr.edu.ar/index.php?id=escuelas/esc4&cod_esc=4

Description: In the School of Anthropology, Faculty of Humanities and Arts at the National University of Rosario, Argentina, a seminar in underwater archaeology is offered on an optional basis as part of the career in anthropology.

In 2009, the Underwater Archaeology Area (established in 1996) was renamed and converted into the Studies Center of Underwater Archaeology in Argentina.

The objectives of the studies Centre are:

- to complement, through underwater archaeology methodologies, archaeological investigations in the region;
- to recover the underwater cultural heritage in the area;
- to promote the training of human resources in this field;
- to disseminate the subject among both academics and the general public.
